EMAIL BODY

I'm writing to urge you to support the PREVENT HPV Cancers Act of 2025 (H.R. 6561).

This bipartisan legislation would strengthen national efforts to prevent HPV-associated cancers through public education about HPV vaccination, increased awareness among healthcare providers and the public, and improved access to cervical cancer screening and diagnostic services for underserved individuals.

HPV causes six types of cancer, affecting both women and men. We have tools to prevent many of these cancers, but awareness and access still fall short. This legislation is an opportunity to strengthen prevention and save lives.

I hope you'll support the PREVENT HPV Cancers Act and help move it forward.
